Experiment -2

Property Buying and Rental Using Zoho One (SaaS)

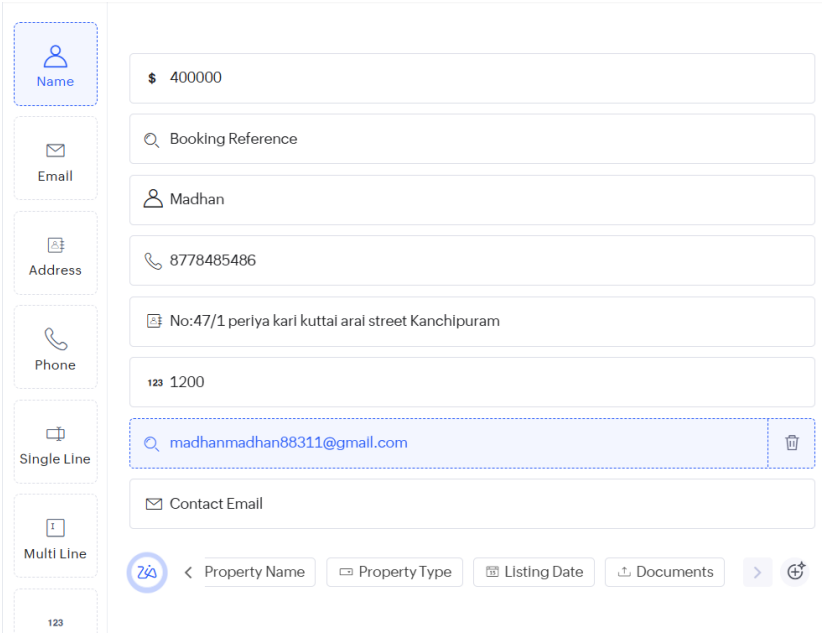

Aim

To create a **Property Buying and Rental** using **Zoho One** as a cloud-based Software as a Service (SaaS) application.

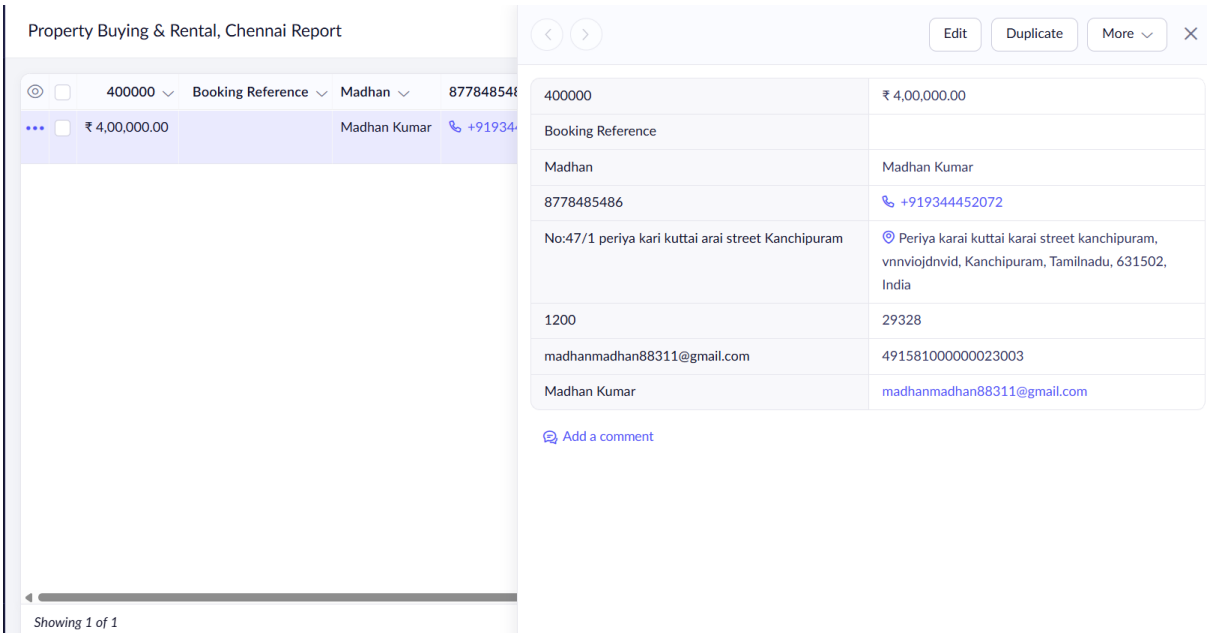

Procedure

1. Access the Zoho One cloud platform using valid login credentials.
2. Navigate to the Zoho Creator application from the Zoho One dashboard.
3. Start a new application and name it **Property Buying and Rental**.
4. Create a form to collect customer, property and buying or rental information for Chennai city.
5. Add necessary fields such as customer name, email, contact number, property category (Buy, Rent, Commercial), area, place, price range, property value, rental agreement, monthly rent, and agreement start date.
6. Select suitable field types, such as name, email, phone, dropdown, radio, number, date, single-line, and currency fields.
7. Customize the form layout to make it simple and user-friendly for buyers, tenants, and property owners to fill in.
8. Configure the form settings and save the application.
9. Publish the application to make the property buying and rental form accessible to users.
10. Fill in the form with sample property details for Chennai areas such as Adyar, Anna Nagar, Velachery, and T. Nagar.
11. Submit the property information and check whether the records are saved correctly in the cloud database and displayed in the Property Listing View.
12. Perform multiple property entry tests to ensure the system operates properly as a Software as a Service (SaaS) application.

## Implementation Input:

Output:

## Result

Thus, a **Property Buying and Rental** was successfully created using **Zoho One** and demonstrated as a **Software as a Service (SaaS)** application.
