Car Booking Reservation System Using Zoho One (SaaS)

Aim

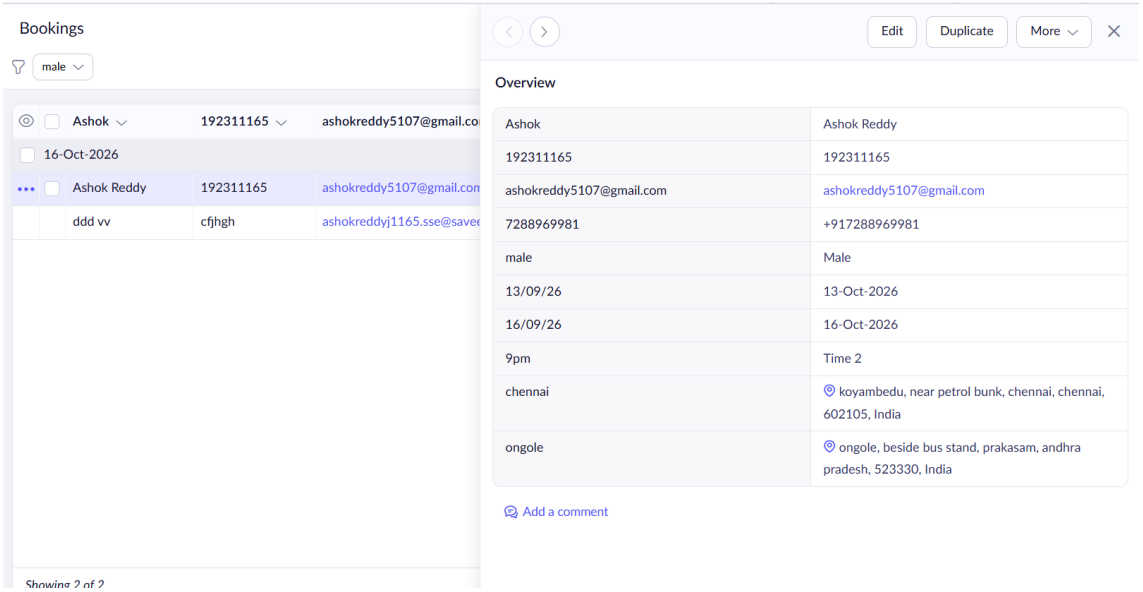

To design and deploy a Car Booking Reservation System using Zoho Creator (part of Zoho One) as a cloud-based Software as a Service (SaaS) application, and to verify that booking data is captured and stored in the cloud.

Steps / Procedure

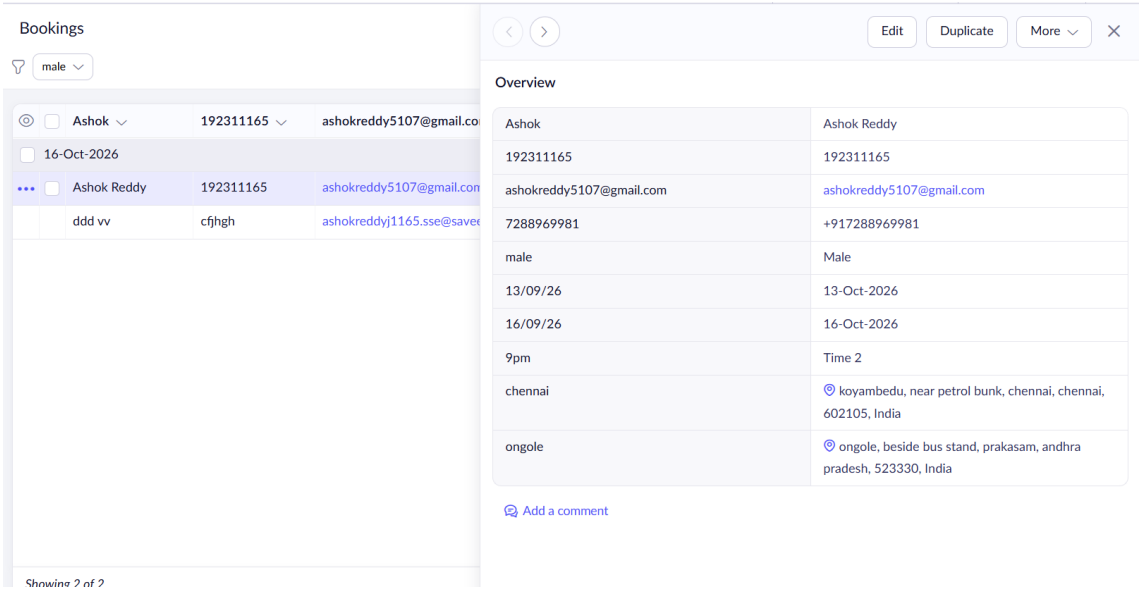

1. Log in to the Zoho One cloud platform with a valid account.
2. Open **Zoho Creator** from the Zoho One applications list.
3. Create a new application for the Car Booking Reservation System.
4. Create a new form named **Book a Cab**.
5. Add the required fields to the form:
    - Customer Name (First Name / Last Name)
    - Employee ID
    - Email Id
    - Mobile Number
    - Gender (Male / Female)
    - Booking Date
    - Travel Date
    - Pickup Time
    - Pickup Address
    - Destination Address
6. Configure the field type for each field (Name, Number, Email, Phone, Radio, Date, Drop-down, Address).
7. Mark the required fields as mandatory and arrange the form layout for easy user interaction.
8. Save the form and access the application to publish it.
9. Enter sample booking details in the form (customer, contact, travel date, pickup time, pickup and destination addresses).
10. Submit the form and open the **Bookings** report to verify that the entered record is stored in the cloud.
11. Test the application with different booking details and confirm each record is saved and displayed correctly.
12. Verify that the Car Booking Reservation System works successfully as a SaaS application.

Implementation

Input:

Output:

Result

Thus, a Car Booking Reservation System was successfully created using Zoho One and demonstrated as a Software as a Service (SaaS) application.
