Experiment -11

Online Supermarket Using Zoho One (SaaS)

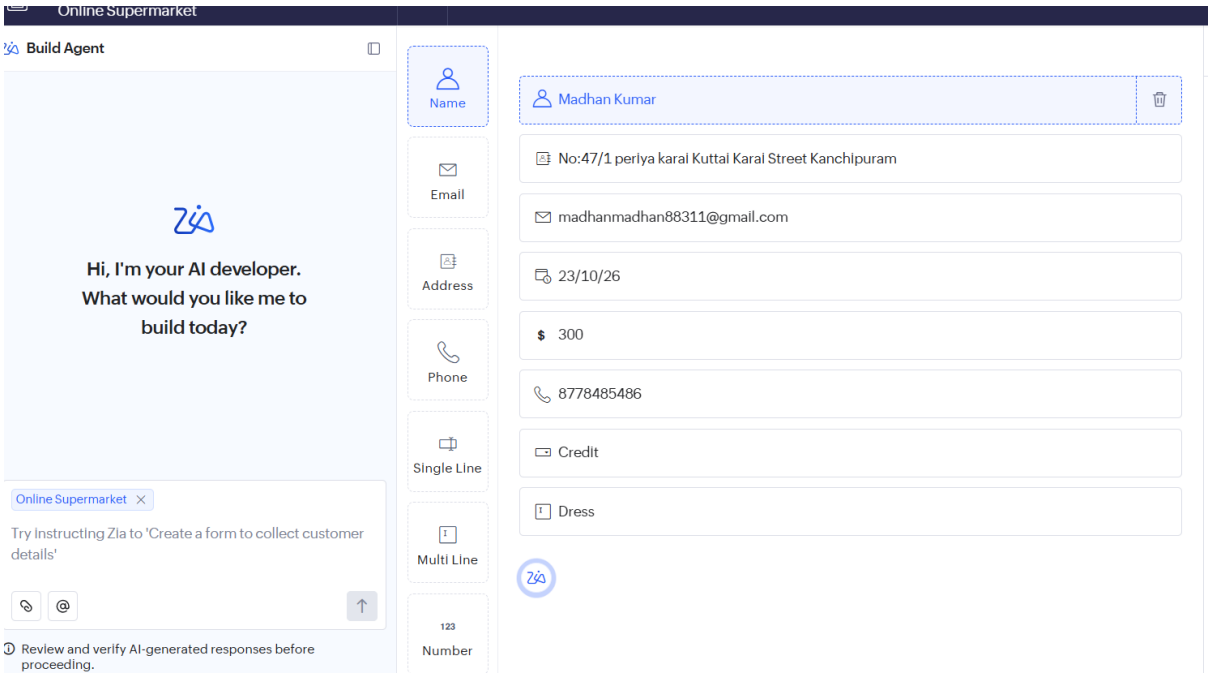

Aim

To create a **Online Supermarket** using **Zoho One** as a cloud-based Software as a Service (SaaS) application.

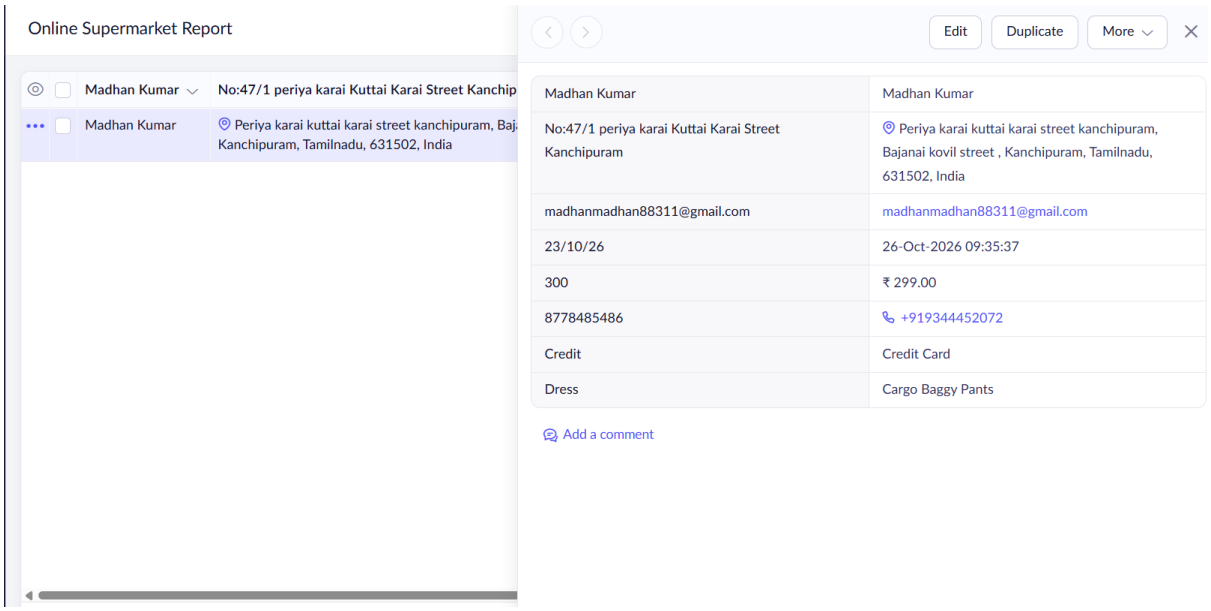

Procedure

1. Access the Zoho One cloud platform using valid login credentials.
2. Navigate to the Zoho Creator application from the Zoho One dashboard.
3. Start a new application and name it **Online Supermarket**.
4. Create a form to collect customer, item and order information for the online supermarket.
5. Add necessary fields such as customer name, address, phone, email, items, item classification, quantity, price, order date, and payment method.
6. Select suitable field types, such as name, email, phone, address, single-line, multi-line, number, currency, date-time, and dropdown fields.
7. Customize the form layout to make it simple and user-friendly for customers to fill in.
8. Configure the form settings and save the application.
9. Publish the application to make the online supermarket form accessible to users.
10. Fill in the form with sample customer details, such as name, address, phone, email, items, and quantity.
11. Submit the order information and check whether the records are saved correctly in the cloud database and displayed in the Online Supermarket Report.
12. Perform multiple order entry tests to ensure the system operates properly as a Software as a Service (SaaS) application.

Implementation Input:

Output:

Result

Thus, a **Online Supermarket** was successfully created using **Zoho One** and demonstrated as a **Software as a Service (SaaS)** application.
