Experiment -5

Mark Sheet Processing Using Zoho One (SaaS)

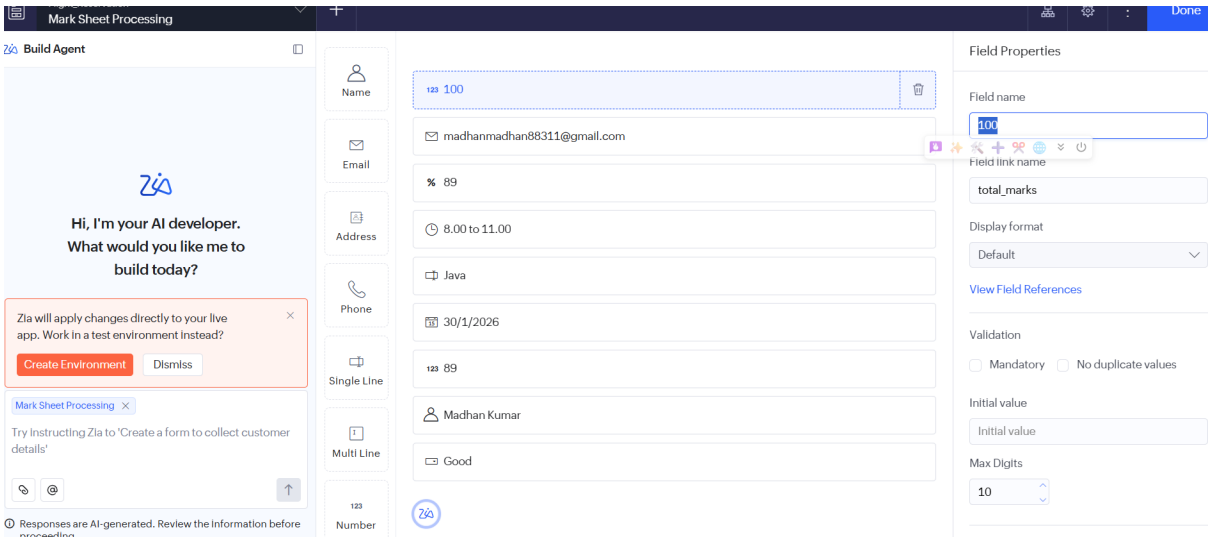

Aim

To create a **Mark Sheet Processing** using **Zoho One** as a cloud-based Software as a Service (SaaS) application.

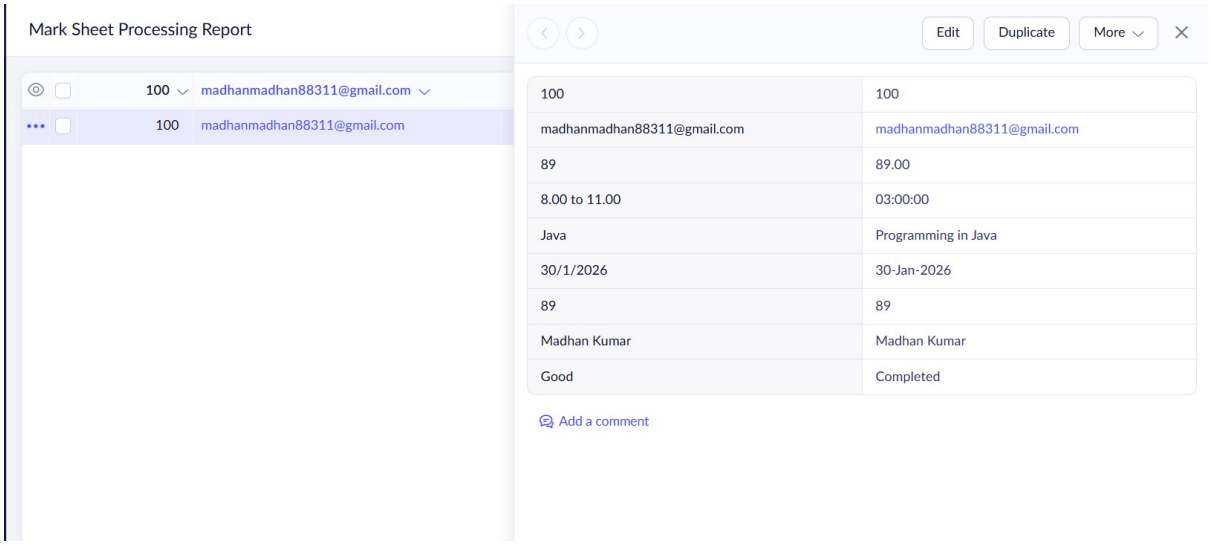

Procedure

1. Access the Zoho One cloud platform using valid login credentials.
2. Navigate to the Zoho Creator application from the Zoho One dashboard.
3. Start a new application and name it **Mark Sheet Processing**.
4. Create a form to collect student, subject and mark information for processing the mark sheet.
5. Add necessary fields such as student name, register number, email, subject, exam date, exam time, marks, total marks, average, percentage, rank, and overall performance.
6. Select suitable field types, such as name, email, single-line, number, decimal, percent, date, time, and dropdown fields.
7. Customize the form layout to make it simple and user-friendly for teachers and staff to fill in.
8. Configure the form settings and save the application.
9. Publish the application to make the mark sheet processing form accessible to users.
10. Fill in the form with sample student details, such as name, subject, marks, total marks, percentage, and overall performance.
11. Submit the mark information and check whether the records are saved correctly in the cloud database and displayed in the Mark Sheet Processing Report.
12. Perform multiple mark entry tests to ensure the system operates properly as a Software as a Service (SaaS) application.

Implementation Input:

Output:

Result

Thus, a **Mark Sheet Processing** was successfully created using **Zoho One** and demonstrated as a **Software as a Service (SaaS)** application.
