Experiment -6

Payroll Processing Using Zoho One (SaaS)

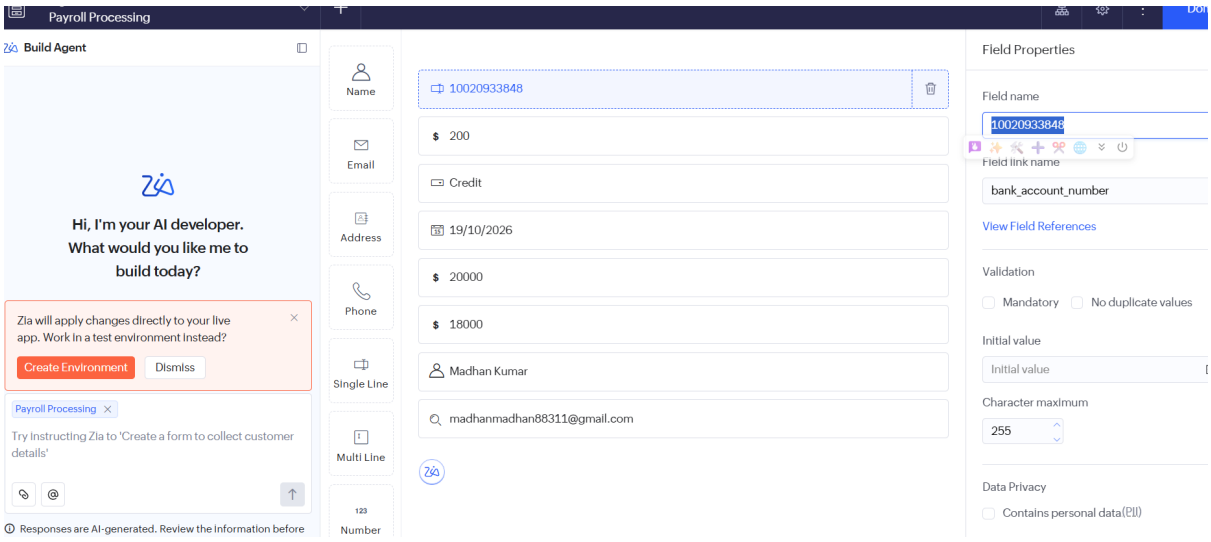

Aim

To create a **Payroll Processing** using **Zoho One** as a cloud-based Software as a Service (SaaS) application.

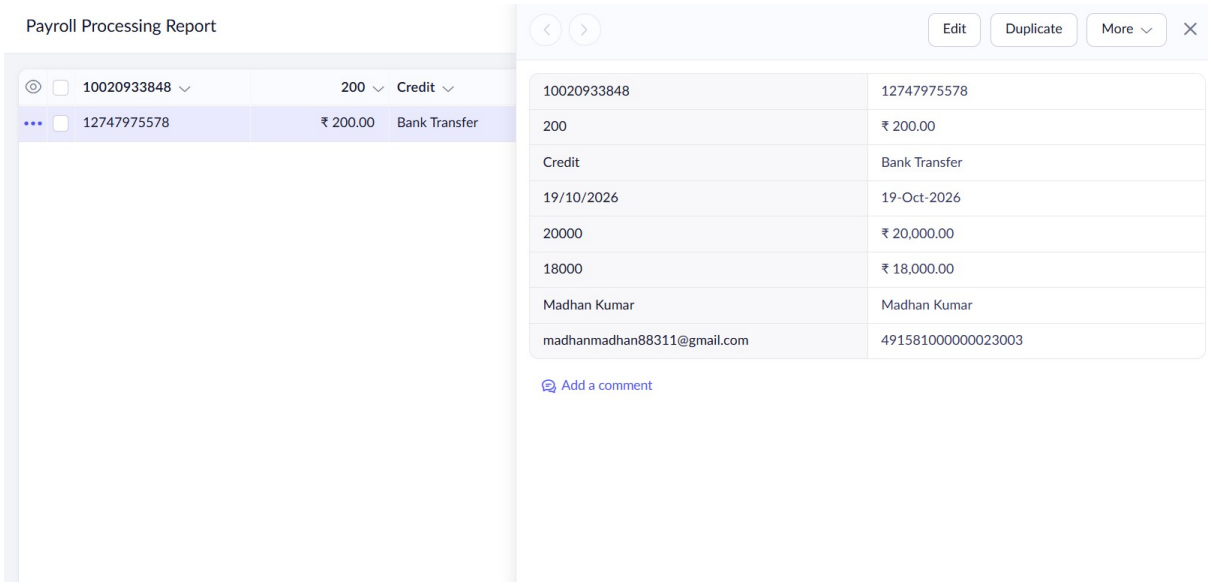

Procedure

1. Access the Zoho One cloud platform using valid login credentials.
2. Navigate to the Zoho Creator application from the Zoho One dashboard.
3. Start a new application and name it **Payroll Processing**.
4. Create a form to collect employee, salary and bank information for processing the payroll.
5. Add necessary fields such as employee name, email, bank account number, experience in present organization, overall experience, basic pay, HRA, DA, TA, gross pay, net pay, payment method, and payment date.
6. Select suitable field types, such as name, email, single-line, number, currency, date, and dropdown fields.
7. Customize the form layout to make it simple and user-friendly for the HR and accounts staff to fill in.
8. Configure the form settings and save the application.
9. Publish the application to make the payroll processing form accessible to users.
10. Fill in the form with sample employee details, such as name, basic pay, HRA, DA, TA, gross pay, and net pay.
11. Submit the payroll information and check whether the records are saved correctly in the cloud database and displayed in the Payroll Processing Report.
12. Perform multiple payroll entry tests to ensure the system operates properly as a Software as a Service (SaaS) application.

Implementation Input:

Output:

Result

Thus, a **Payroll Processing** was successfully created using **Zoho One** and demonstrated as a **Software as a Service (SaaS)** application.
