Experiment -8

Student Counselling Using Zoho One (SaaS)

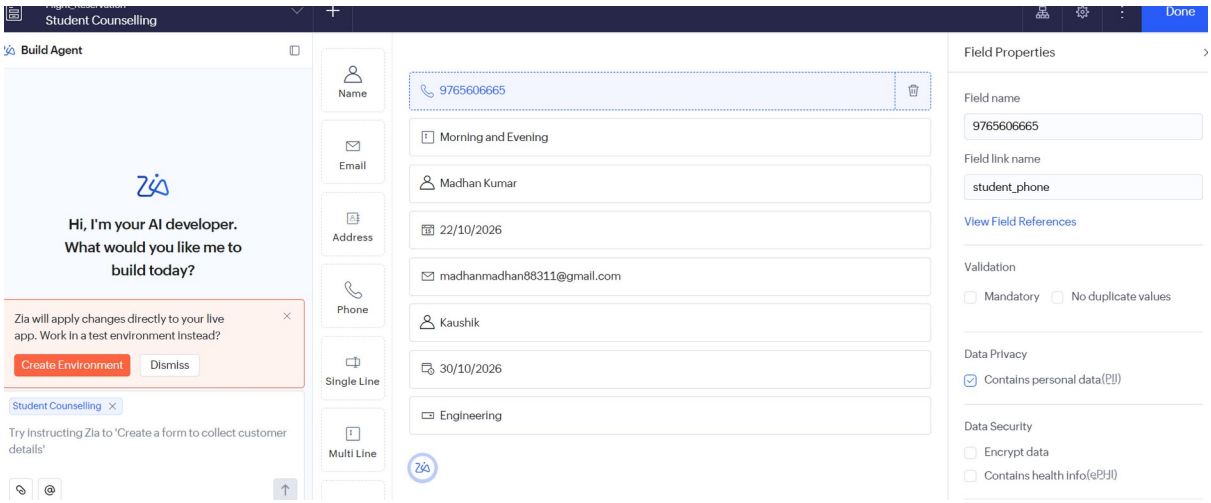

Aim

To create a **Student Counselling** using **Zoho One** as a cloud-based Software as a Service (SaaS) application.

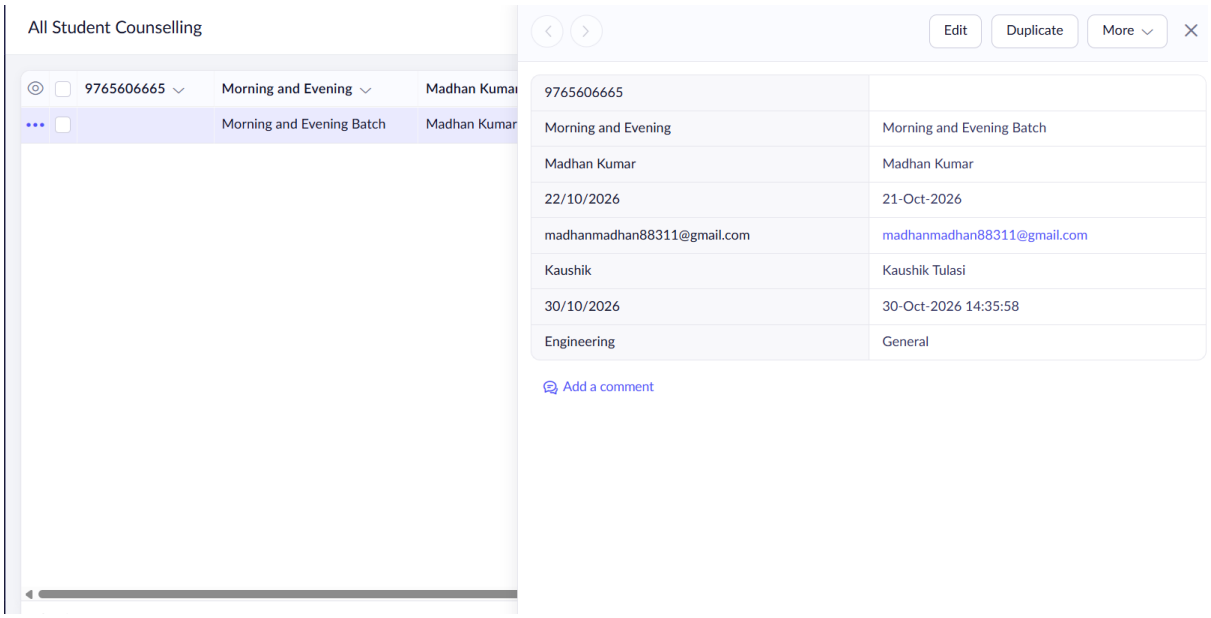

Procedure

1. Access the Zoho One cloud platform using valid login credentials.
2. Navigate to the Zoho Creator application from the Zoho One dashboard.
3. Start a new application and name it **Student Counselling**.
4. Create a form to collect student, academic and counselling information for the student counselling system.
5. Add necessary fields such as student name, age, address, phone, email, subjects studied, year of passing, percentage of marks, domain interest, preferred batch, counselling date, and counsellor name.
6. Select suitable field types, such as name, email, phone, address, single-line, multi-line, number, date, and dropdown fields.
7. Customize the form layout to make it simple and user-friendly for students and counsellors to fill in.
8. Configure the form settings and save the application.
9. Publish the application to make the student counselling form accessible to users.
10. Fill in the form with sample student details, such as name, phone, email, percentage of marks, and domain interest.
11. Submit the counselling information and check whether the records are saved correctly in the cloud database and displayed in the All Student Counselling Report.
12. Perform multiple student entry tests to ensure the system operates properly as a Software as a Service (SaaS) application.

Implementation Input:

Output:

Result

Thus, a **Student Counselling** was successfully created using **Zoho One** and demonstrated as a **Software as a Service (SaaS)** application.
