Experiment -1

Car Booking Reservation System Using Zoho One (SaaS)

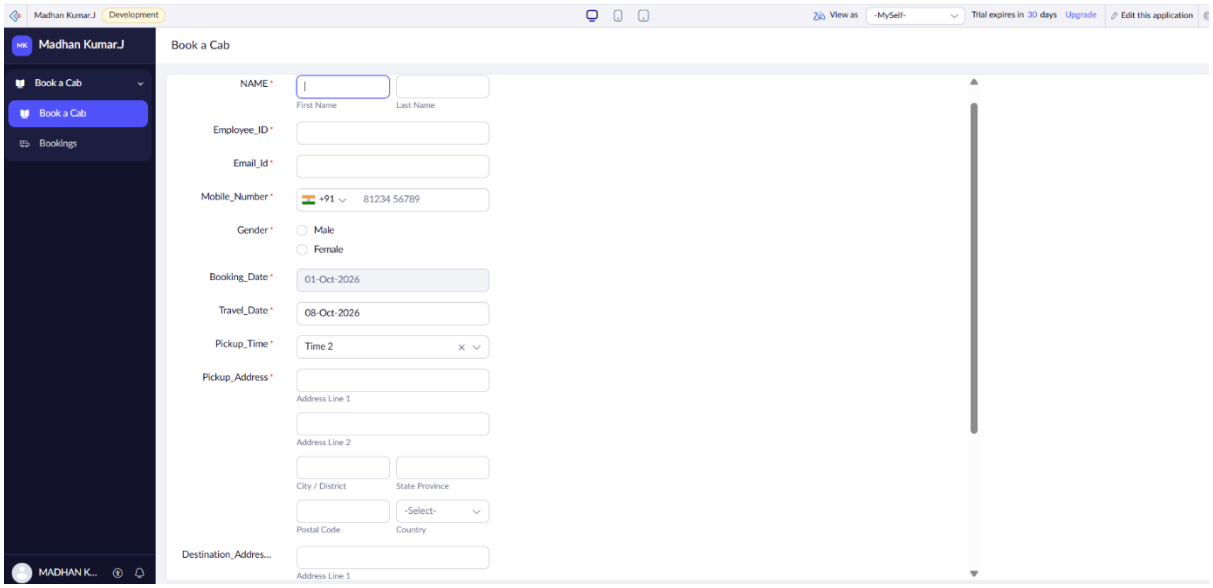

Aim

To create a **Car Booking Reservation System** using **Zoho One** as a cloud-based Software as a Service (SaaS) application.

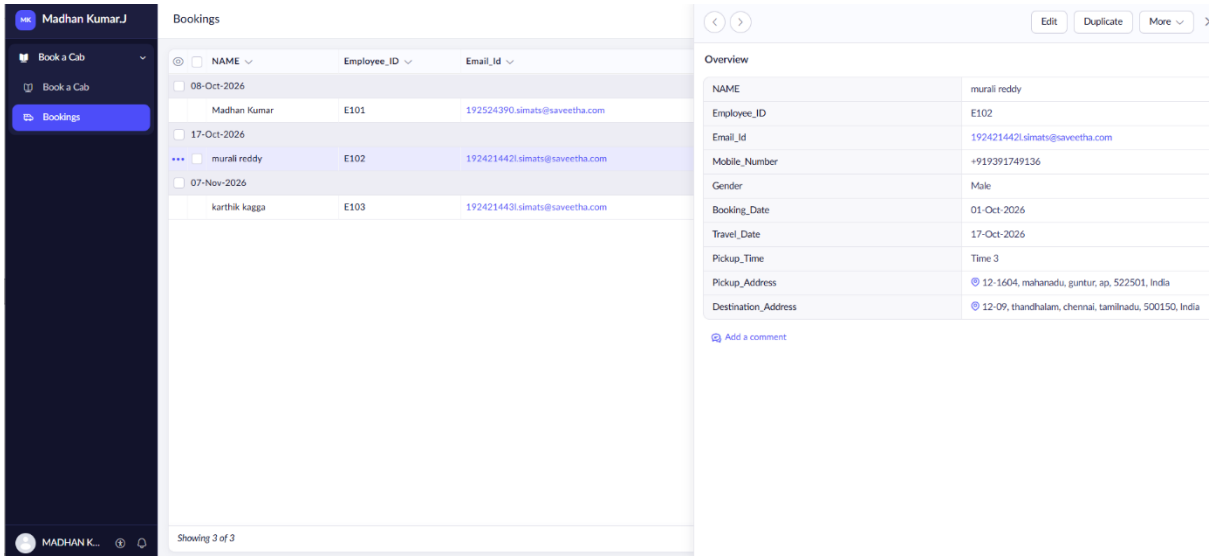

Procedure

1. Open the Zoho One platform and access the cloud-based workspace.
2. Select Zoho Creator from the available applications.
3. Initialize a new project with the name **Car Booking Reservation System**.
4. Create a reservation module to manage customer booking information.
5. Include fields for pickup point, drop location, rental service, outstation trips, package selection, and booking duration.
6. Assign appropriate data types to each field based on the booking requirements.
7. Configure the form layout and organize the fields for convenient data entry.
8. Set up the application to collect and manage car reservation requests.
9. Deploy the application through the Zoho Creator platform.
10. Add sample customer and vehicle booking information to the reservation form.
11. Check the submitted records to ensure that the booking details are stored correctly.
12. Evaluate the application's functionality by creating multiple reservations and verifying its cloud-based operation.

**Implementation Input:**

Output:

Result

Thus, a **Car Booking Reservation System** was successfully created using **Zoho One** and demonstrated as a **Software as a Service (SaaS)** application.
